

Primary & Community Services

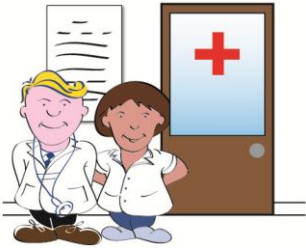

Dear

I have just received the results from your smear test. This shows a lot of changes in the surface of the lining of the opening of your womb (your cervix).

This needs to be checked.

You will be asked to come to the clinic at the hospital. You must come to the appointment.

An appointment letter will be sent to you in the next 8 weeks

If you do not get the appointment letter or need to change the time or date please phone.

Yours Sincerely
